Coral more complex than humans?

Maybe you know that what we look like; the color of our eyes and all these features, is determined by genetic molecules in our body's cells. We call these sources of information in our cells "genes". Human beings have about 23,000 different genes. Researchers found that the beautiful coral making up our reefs have more than 10,000 genes, and think they could ultimately find that coral has more genes than humans. Evolutionists considered coral to be "a simple animal", with many less genes than humans. But the researchers say its genetic complexity "challenges the notion that life started out simple, then evolved to become more sophisticated". Science simply contradicts this.... These "simple" corals simply occur highly sophisticated... no signs of any evolution.

Another surprising finding has been that coral shares many genes with humans, including those related to the development of immune systems. We are not surprised about these similarities because both corals and humans are created by the same CREATOR not that long ago. If we were to "create" different cups, wouldn't there be a similarity as well? Try it!

IN THE PICTURE ...

Mrs. Laney

Could you tell us, in short, your testimony?

When I was four, my family moved to Vianopolis, Brazil with NTM, which is a school base. My dad worked as a mechanic, carpenter, and a plumber. At about 5 or 6 years of age I went to a Sunday service where the speaker was preaching that not just the tribal people need the gospel and that we need it too. I had always know about salvation but it never dawned on me that I needed it too. It was that day that I accepted the Lord! I was fourteen when our family went back to the states to NTMA in Arizona. My parents divorced in 2002 and after that I went to college where I met Aaron.

Did you have any pets while you were an MK in Brazil?

I had a puppy and my friend had an anteater that would suck up all the ants, it was always lots of fun. Lots of people had monkeys, they would steal our snacks. We had toucans which were really pretty but ate a lot! We also had parrots and songbirds.

What did you do for fun while you were in Brazil?

Lots of exploring. We lived on a plateau where we would hike down the mountain, swing on vines over rivers, and walk through plantations.

What made you and Aaron decide to come to PNG?

We love the people. We came for a visit in 2006 to Kaulong when we were first married. We saw how loving the people were and also it was amazing to see the joy on their faces after hearing the gospel.

What do you think is the biggest sacrifice you made to come to PNG?

Being away from family. Aaron and I knew from a young age that we both wanted to go into missions, but being away from family is always hard.

If you could be any animal in the world what would you be and why?

The Song Bird, because it is beautiful and it has the ability to fly around and see God's creation.

What do you now do in your spare time?

Mostly reading and making cards.

Is there anything that you would like to pass on to the kids at Malango?

To be faithful in everything, even the small things. We don't know when God will use our lives. But if we are faithful then we are ready and available vessels.

MW

Animals are such agreeable friends - they ask no questions, they pass no criticisms. George Eliot

HOT NEWS

Friday November 12th
Dress Up Day

S. E. W.

From Thursday November 18th to
Saturday, November 20th

INTERESTING FACTS!

- Male Koalas feed during the day and Female Koalas sleep all day and feed at night.
- Hagfish have teeth on their tongues.
- Bulls are color blind.
- Emus can't walk backwards.
- Mosquitoes have 47 teeth.
- Goldfish have a memory span of 3 seconds.

BRAIN BUSTER

1. What is the next letter in this sequence?

O T T F F S S E _

2. Johnny's mother had 4 children. The first was named April, the second May, and the third June. What was the name of her fourth child?

3. What happened in 1961 and will not happen again until 6009?

BIRTHDAYS

Mitchell Whitman
Monday, November 15th

Guess

.....

where?

HIDDEN CAMERA

Matthew 10:29-31
**Are not two sparrows sold for a penny?
Yet not one of them will fall to the ground
outside your Father's care...you are worth
more than many sparrows**

Impact

There it is! Can you see it? Wow, that is beautiful! Look, there are hundreds of those bright blue neon fish. The variety and color of the ocean fish are amazing. Each time I snorkel or scuba dive I am amazed at our Creator's array of differences. Who else would have thought to put so many shapes, sizes and colors slightly below the surface for our enjoyment? From the beginning of Creation, animals have been created for the sole purpose of bringing glory to God alone. The first recorded animal dying came as a result of the first sin. To think, Adam and Eve sinned, and God killed animals so they could have a covering for their sin. Christ is the Lamb of God and, while not a real animal, is a real picture for us to see that God, in His creative power, uses things we can see and understand to purchase our redemption.
